**PART 1:** Review Comments

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>The topic is a very interesting one , however , the author(s) should add up more detailed information. The article being a comprehensive study shows lack of depth in some sections. The following sections should be improved with many detailed and referenced statements.</p> <ul style="list-style-type: none"><li>1. Air Pollution Exposure Assessment</li><li>2. Health Outcomes</li><li>3. How to prevent</li><li>4. Noise pollution</li></ul> <p>It is noticed that the information in these sections is a poor , the article reads like an assignment not a research article. Review articles are generally extensive studies with many references and very critical approach in discussions. Not a descriptive text with only what has been done in previous studies. Therefore , I recommend a major revision of this article to fit with the criteria of a true review article which is a critical assessment including novel approaches to be explored.</p>	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
