Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**1**)Scientific terms must be used instead of using common words.(check highlighted with red-write resistant or susceptible instead of using words such as enemy etc in abstract) 2)Sentence framing should be proper with good quality of English language for the reader to understand. 3) short forms should not be used for numbering as well as written part (eg: 2-two; they're –they are) 4)Species name in scientific name should be in small letters. entire paper is in wrong notation of scientific name.It should also be in italics. Please correct it(eg:*Linum Usitatissimum should be written as Linum usitatissimum*) 5) Table 1 in the refined water concentrate of flax terpenoids, heart glycosides, tannins and saponins were available yet no flavonoids But it did not match with tabular data. 6) In Table 1. Results of all column tabular data was not discussed 7)While describing activity of table 2 and 3,concentration of extract and zone diameter should also be indicated in brackets. 8) In table 4, at what concentration of extract antifungal activity exhibited should also be indicated in brackets. 9)Table 5 results were not analysed properly. which extract inhibited which fungus and at what level should be clearly discussed. 10)short forms should not be written for essential oils as EO. 11)Modes of action shouls be predicted using proper references. 12)Zones of inhibition plates against various bacteria and extracts need to be submitted 13)Conclusion part not written 14) 3)Positive and negative controls should be properly disussed and should be compared properly with tabular data 14)How standard is reflecting on evaluation of data should be properly discussed. 15) A brief acknowledgment sectionis needed. 16) Declaration of competing interest should be disclosed. 17) citations should be indicated by the reference number in brackets . 18) references should follow the style as per manuscript guidelines. 19) Check author guidelines for declaration of AUTHORS CONTRIBUTIONS,CONSENT,ETHICAL APPROVAL	
Minor REVISION comments	1)Heart glycosides Should be replaced with cardiac glycosides 2)The main oil and eugenol were inhibitorous for all tested strains was written in discussion.That oil name should be mentioned. 3)year of reference should also be quoted along with author name in discussion part 4)There is repition of your own results in discussion part.if not, quote reference 5) H2SO4 2 and 4 should be written as subscript.	
Optional/General comments	1)Highlighted yellow-already corrected 2)Highlighted red-need to be corrected(or technical terms should be used) 3)Figure and table captions should reflect the depth in subject. There are no figures at all to describe experiment with proof
