PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none">- The study protocol should include intended benefits rather than the expected results and conclusion.- Since it will be a clinical study of placement of implants 20 dental patients using two different techniques, there must be a hypothesis explicitly written in the introduction part. NULL AND ALTERNATIVE HYPOTHESIS MUST MENTIONED.- Attempt should be made to avoid attrition of the sample. Hence although the required sample will be 20, to avoid any loss of sample to follow-up, its better to increase the sample size.-	
Minor REVISION comments	English and grammar should be reviewed	
Optional/General comments	Recheck the references	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
