PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Abstract – need revision, aim is not phrased properly one can not make out which variables are studies, duration of study Results are not given in numeric value Conclusion is not proper – objective, methodology , results and conclusion should be aligned Introduction: Too long, make it brief- contain unnecessary and basic information Rational/justification of this study and its implications on present practice and knowledge not are not given Proper literature review as per objective needs to be given Methodology: Clearly mention which variables are assessed and how? Discussion: Too brief- needs more elaboration Make it directed towards conclusion Discuss each variable separately in separate para, compare with literature and give reasons/justification	
<u>Minor</u> REVISION comments	Introduction- too long Discussion- too brief- need more elaboration Add results in abstract Abstract make more precise with all important informations	
<u>Optional/General</u> comments	Look for grammer, sentence continuity
