## Review Form 1.6

### **PART 1:** Review Comments

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	1. Define the variables clearly some place it is psychological disorder, mental effect and patient behaviour. Author should make it univocal 2. Study is about patients attitude the type of scale used is made by the author was it tested and some reliability identified give clarity in the methodology 3. related behaviours the author says but the questionnaire presented does not give clarity 4. It is not a cross sectional study rather a descriptive study-only one OPD population is taken same organisation 5. Patients were illiterate also so how did they read and fill? 6. Attitude is different from awareness what was actually measure? 7. Should avoid commenting on personal pretentions 8. The study did not measure anxiety. 9. Cannot generalise the findings just with this study so recommendation should flow in making the patient be aware and alleviate fear and anxiety during the procedure. 10. If there was a observer then why there were incomplete forms and attrition in samples? Explain 11. Fear of covid or emotion. Need to make it clearer and more univocal. many interpretations and many words. 12. No research is still evident on mortality only due to covid. So can rephrase that. This may cause fear to the patients	
<b><u>Minor</u></b> REVISION comments	a. Study is on patient review to be on patient related findings rather than dentist related issues b. mean, SD not universal abbreviation c. If researcher was there how this happened? d. 11 illiterates how they filled the questionnaire? an give clarity on inclusion /exclusion criteria of sample selection e. Header, footer including sample size for all tables to be made. F .Looks like breach of covid SOP .can avoid such variables g. All covid 19 death does not happen? h. Should make it univocal. i. Year of research work	
<b><u>Optional/General</u></b> comments	Can present the recommendations and future direction of the study.	

### **PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<u>(If yes, Kindly please write down the ethical issues here in details)</u>
