PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Abstract: On p.1 the name of the muscles were written once with capital letter, then – not. About the results: t test, Anova and Karl Pearson correlation method – it's not a results, should be written in methodology. Significant difference is when $p < 0.05$. The whole article should be written in Past Time. Itroduction: In graph.1 – you should note all the numbers, and I think you missed blood type 0+ you cited authors, who weren't mentioned in the bibliography	
<u>Minor</u> REVISION comments	Conclusion – you should write more effective summary.	
<u>Optional/General</u> comments	The article is novel and intriguing, but it needs some corrections.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
