**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	<p>In this manuscript, the authors review different aspects related to implantable drug delivery systems, such as manufacturing, applications, advantages, and limitations. It's an interesting and relevant work, however I have some comments to improve quality and clarity:</p> <ul style="list-style-type: none"><li>- There are some problems in language and spelling. A throughout checking is recommended.</li><li>- Please check the final part of the abstract. The text is incomplete.</li><li>- References should be added to each paragraph to support the ideas that have been presented.</li><li>- A link must be made in the text to the figures and tables. Some illustrations do not have any citation throughout the manuscript (e.g. Table 1, Fig 1, Fig 2).</li><li>- There are different abbreviations in the text with no explanation of what they mean: ICRDDSSs, ICDDDS, IDDSS.</li><li>- It will be interesting to have a topic discussing perspectives related to implantable delivery systems.</li><li>- Most of the cited references are old. Recent studies on the subject should be added.</li></ul>	
<b><u>Minor</u></b> REVISION comments	Described above.	
<b><u>Optional/General</u></b> comments	Described above.
