### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljpri.com/index.php/JPRI/editorial-policy>)

### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	<ol style="list-style-type: none"><li>1. Though your work did not directly expose the volunteers, it is still counted as a human research and ethic approval must be declared.</li><li>2. Rate of stress induced menstrual cycle irregularities before pandemic of COVID-19 is an important data for this study. Without this information, you cannot indicate whether the pandemic causes stress leading to this abnormality.</li><li>3. You use a questionnaire to collect your results which may not be accurate. How much did the volunteers know about menstrual cycle irregularities? Since they answered your questionnaire once, how did you make sure that the recruited volunteers did not have any exclusion criteria such as pregnant and psychotic disorders?</li></ol>	
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments		

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i> Yes, this is a human research but the author did not declare the ethical approval.
