PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<ol style="list-style-type: none">1. In the abstract, you have mentioned fibrinogen levels and in the results you have shown fibrinogen levels and then in the conclusion of the abstract and the article, it has been mentioned as Prothrombin. Prothrombin means what?? Is it Prothrombin time ?? Or is it Fibrinogen levels??2. The first marker is CRP. What is the second marker? Prothrombin time or Fibrinogen?3. CRP and fibrinogen levels increased with number of metabolic abnormalities has been mentioned by the authors but this has not been shown in the results. The authors should show that as the CRP and fibrinogen levels, the patient has more components of the metabolic syndrome or the components that the patients have worsen like glucose control, ldl, hdl levels etc.	
<u>Minor</u> REVISION comments	<ol style="list-style-type: none">1. In the exclusion criteria, mention oral contraceptives as a different point.	
<u>Optional/General</u> comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
