## **Review Form 1.6**

## **PART 1:** Review Comments

	Reviewer's comment	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should
		write his/her feedback here)
<u>Compulsory</u> REVISION comments	- From a scientific point of view, the reference research is very important to clarify the importance of organic food and its impact on public health	,
	- The summary of the research was presented in a distinguished scientific way	
	- By explaining that organic farming is an ideal type of agriculture when compared to chemical-based inorganic farming. Eating inorganic food and chemicals has been linked to a number of diseases. The current study focused on the fact that organic foods are free of pesticides and are beneficial to public health. It also promotes the consumption of organic foods and their benefits from a public health perspective	
	- By displaying the points of the Review Article, starting from the introduction to the end of all points, the focus was on:	
	- The regulatory bodies recommends that radiation exposure, industrial solvents and artificial food supplements should not be used in the processing of organic food. Organic food producers should not use synthetic fertilizer and pesticides	
	- Nonorganic food which is produced by using chemical fertilisers impacted human health such as reduced intellect, reproductive deformities, digestive dysfunction, headaches, ADHD (Attention Deficit Hyperactivity Disorder), prenatal deformities, early mortality and cancer.	
	- Organic foods promote the utilisation of sustainable energy supply and the conservation of soil and water in order to improve ecological sustainability for coming generations.	
	- Organic food has delicious taste which makes sense because fertile soil and plants produce the best tasty food.	
	- The organic food is better option to the people having allergies to nonorganic food, chemical and pesticides remnants or additives.	
	- The references are recent and distinct, but they must be reviewed so that they are written in a correct scientific manner.	
Minor REVISION comments	- In ABSTRACT: This acronym should be corrected from:	
	ADHD (attention deficit hyperactivity disorder( to become (Attention Deficit Hyperactivity Disorder).	
	- The beginning of the words must be written in capital letters at the beginning of paragraph No. 3	
	- GMOs are Genetically Modified Organisms	
	- The abbreviations for linolenic acid isomers should be corrected in paragraph 6 of the CLA and amended to (LAI)
