Title of the Manuscript:	Frequency of complete heart block (CHB) and its association with hypertension and diabetes mellitus in patients with anterior wall myocardial infarction (AWMI).
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljpri.com/index.php/JPRI/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The authors need to work on the references. They cited over 80 articles and publications that were not reflected in the reference list.	
<u>Minor</u> REVISION comments	Authors need to take corrections on the highlighted grammatical errors.	
<u>Optional/General</u> comments	Your paper is interesting. The aim is to investigate if there is a significant association of complete heart with hypertension, diabetes mellitus, gender, age, smoking, CAD family history, and chronic kidney disease. The only challenge is that it was developed with few experimental subjects and one study area. However, I recommend the manuscript for publishing.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
