PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|---|---|
| Compulsory REVISION comments | Could you please in Table 5 : Factors associated with knowledge level of COVID-19 ocular manifestations, give the headings over the three columns of results, as it is confusing the reader. | |
| Minor REVISION comments | Could you please revise the syntax of background of the participants are , as you have to choose backgrounds/are or background/is, in page 3 , last line of first paragraph. Could you please revise the syntax This was followed by pilot testing, following which, it was disseminated to the medical students. , in page 2 , section 2, line 20. In ETHICAL APPROVAL and REFERENCE, please do not use uppercase but only lowercase letters of the same font to the rest of the text. | |
| Optional/General comments | In General is a very good structured article. It has good analysis of results, comparative discussion and robust conclusions. Furthermore, my concern is whether it could be possible to identify the the type of COVID, if it is ALPHA, DELTA or OMICRON depending on the time of the test (not mentioned) as this will affect the infectivity. | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|---|---|
| Are there ethical issues in this manuscript? | (If yes, Kindly please write down the ethical issues here in details) | |
