

## Review Form 1.6

Journal Name:	<a href="#">Journal of Pharmaceutical Research International</a>
Manuscript Number:	Ms_JPRI_87459
Title of the Manuscript:	TO ASSESS THE ROLE OF NIMESULIDE IN THE TREATMENT OF COVID-19 INFECTION
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljpri.com/index.php/JPRI/editorial-policy>)

### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	Typographical and spacing errors should be DULY corrected  <b>Methodology</b> Despite that this was an uncontrolled longitudinal study, and criteria for inclusion as a population sample was stated; the study failed to specify reason(s) or give justification for the '66' eventually sampled. <b>Could it be it was done based on 'convenience' or 'judgmental', hence purposive sampling technique...?</b> In the same vein, reason(s) for settling with ' <b>consecutive sampling technique</b> ' was not stated thus remained questionable? The references should be correctly structured using the right APA style	
<b>Minor</b> REVISION comments	"Nimesulide" is a noun and as a name of a drug, it should therefore reflect in that manner in the study. There should be proper pagination of the manuscript	
<b>Optional/General</b> comments	<b>COVID 19 is still a serious issue of concern to the world at large.</b> This study should flesh out the introduction ANALYTICALLY & CRITICALLY to address the Corona virus as a disease which is not to be trivialised. Some logical questions of concern which are pertinent to this very research and would serve as concrete background to the study are: <ul style="list-style-type: none"><li>• Why the serious search for drug/ vaccine?</li><li>• What is the death rate, globally with regard to Corona virus?</li><li>• What has been the failure/ solutions so far and its effect?</li><li>• With your "Nimesulide" solution/ suggestion, what is the future of human race as regard the life threatening disease called "COVID"?</li><li>• ...etc.</li></ul> <b>Therefore, there should be SUGGESTION(S) FOR FURTHER STUDIES after Conclusion.</b>	

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<u>(If yes, Kindly please write down the ethical issues here in details)</u>
