

Review Form 1.6

Journal Name:	Journal of Scientific Research and Reports
Manuscript Number:	Ms_JSRR_85982
Title of the Manuscript:	Optimization and simulation analysis of loader driving stability system based on differential connection
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>The article is well argued at a mathematical level. However, I have some minor observations which are:</p> <ol style="list-style-type: none">1. The topic: Optimization and simulation analysis of loader driving stability system based on differential connection" should be : "Optimization and Simulation Analysis of Loader Driving Stability System based on Differential Connection.2. The spelling of your Abstract is incorrect. Please Correct it. The Abstract should be in capital letter ; "ABSTRACT"3. The headings should be in capital letters. For example "1. INTRODUCTION " "2. DYNAMICS MODELING OF THREE-DEGREE-OF-FREEDOM VIBRATION SYSTEMS" "3. PAVEMENT EXCITATION MODEL" e.t.c4. The subheading "2.2 Mathematical modeling" should be: "2.2 Mathematical Modeling" The Modeling should start with an upper case5. The superscript numbering of the references in the body of the article doesn't conform to that of the journal's format. For example, at the last sentence of your introduction: "and the efficiency of engineering operations^[1]". It should be: "and the efficiency of engineering operations[1]". Do the same thing for the other numbering of the references in the body of the work.6. The equation numbering should be aligned.
