### PART 1: Review Comments

|                                     | Reviewer's comment  | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|---|---|
| <b>Compulsory</b> REVISION comments | <ul style="list-style-type: none"><li>- The topic is very important and interesting and its results are valuable.</li><li>- The research design did not mention in this research report.</li><li>- Ethical consideration such as ethical approval, informed consent, anonymity, and data confidentiality has to be included as part of the research methodology.</li><li>- Discussing the results and comparing them with the results of previous studies should be written in a separate section entitled "Discussion" after the results section directly.</li></ul> |   |
| <b>Minor</b> REVISION comments      | <ul style="list-style-type: none"><li>- It would be better if the researcher describe the items of tool used in data collection, the scoring system if present, and its validity and reliability.</li><li>- The numbering of the parts of the research report needs to be revised.</li></ul>  |   |
| <b>Optional/General</b> comments    | The researcher mentioned "WASH disease" without definition, so I suggest adding the operational definition of this abbreviation in the research report.   |   |

### PART 2:
