PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	• When writing mathematical formulas, use appropriate it tools (e.g. MS equation). Furthermore, it is necessary to clarify all variables and write the measurement units in which they are expressed. • There is no information in the manuscript on the statistical method used in data processing. Also, the name of the computer program in which the data were processed is not specified and there is no indication of the number of repeated analyses performed. • Given the scope of the results presented, it is necessary to improve conclusion section. Please rewrite it and focus more on how your research has contributed to knowledge gaps; describe research limitations for future research.	
Minor REVISION comments	• Standardize the font type in manuscript (literature has a different font type).	
Optional/General comments	• The title cover the main aspects in this paper, it reflect the aim and scientific purpose of conducted experiment. The abstract submitted does explain the meaning of the study. The methods used in this paper are appropriate to the aim of the study.	

PART 2:

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Are there ethical issues in this manuscript?	*(If yes, Kindly please write down the ethical issues here in details)*
