Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>It is better if the title is arranged like this;</p> <p>A Review on Important Foodborne Zoonotic Parasites of Southeast Asia</p> <p>i.e., no need to say mini review something it is just one work another person can work with another view because time by itself will update things so it is my view if it is rearranged like that. I think 76 reference is enough. Here my suggestion the author better to add some recent references as suggested below.</p> <p>The abstract part should be supported by the core findings and investigation that are highlighted in the discussion part or you can take points from your conclusion part. So that it will give full image what was investigated and done.</p>	
Optional/General comments	<p>It is good if there will be One Health Approach from Veterinary Public Health Perspective as a sub section. And if the author is will to add this, I recommend the following articles should be included;</p> <p>Status and perspective of asian neglected tropical diseases - ScienceDirect</p> <p>Helminth infections in fish in Vietnam: A systematic review - ScienceDirect</p> <p>Prioritization of zoonotic diseases of public health significance in Nigeria using the one-health approach - ScienceDirect</p> <p>Foodborne zoonotic parasites of the family Opisthorchiidae - ScienceDirect</p> <p>Waterborne zoonotic helminthiases - ScienceDirect</p> <p>One health and One medicine: A review of the literature - Refaad</p> <p>Zoonotic Taenia infections with focus on cysticercosis due to Taenia solium in swine and humans - ScienceDirect</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
