PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	1. It should be noted that this is a preliminary study, since the sample size is very small, the same study should be continued, but calculating the appropriate sample size. 2. The names of microorganisms should always be written in italics. 3. Regarding the frequency of the sputum sample, the results of Omer et al and Abdallah et al, are similar to those of the authors. However, those of Opazo et al are not. 4. On page 8, third paragraph, the text says: a total of 33 Albuminoid. What does it mean? 5. The finding of the OXA-48 gene is similar to that obtained by the authors. 6. Eliminate table 2, since it repeats what was said in the text. 7. If possible, update references.	
Optional/General comments
