Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<div>1. The study conceptual framework suggest that the researcher(s) intend to use environmental factors, political instability and black swan as moderating variables, but there is no strong justification as to why environmental factors, political instability and black swan can stand moderating variables in the study. Please, I suggest the researchers should consult these studies for beteer understanding about interaction studies,</div> <div>Baron, R. M., & Kenny, D. A. (1986). The moderator–mediator variable distinction in social psychological research: Conceptual, strategic, and statistical considerations. <i>Journal of personality and social psychology</i>, 51(6), 1173.</div> <div>Dawson, J. F. (2014). Moderation in management research: What, why, when, and how. <i>Journal of business and psychology</i>, 29(1), 1-19.</div> <div>Hayes, A. F. (2017). <i>Introduction to mediation, moderation, and conditional process analysis: A regression-based approach</i>. Guilford publication.</div> <div>2. There is no moderation in the model and analysis of the study. The researcher(s) most amend the analysis or the framework to align with the content of the paper</div> <div>3. The researcher(s) ought to have used heteroscedasticity test to check for the presence or otherwise of heteroscedasticity in the data set.</div>	
<u>Minor</u> REVISION comments	<div>1. In abstract and analysis section, “adopted panel ordinary least squares technique” or Panel regression? You can have Ordinary Least Squares Regression or Panel regression. Thus, based on your data, you adopted Panel regression not panel ordinary least squares technique .</div> <div>2. Intervening Variables, not a substitute for moderating variables as presented in the framework</div> <div>3. Please, check page 13 para 2, are you not contradicting your arguments in the abstract claiming that you used Fixed Effect Model?</div>	
<u>Optional/General</u> comments
